TECHNICAL SKILLS

Frontend

HTML5, CSS3, JavaScript (ES6+),
React.js (v16 to v21 Migration), Context API,
Reusable Components, RBAC, Bootstrap,
Tailwind CSS, Material UI

Mobile

React Native (Android & iOS), Expo,
Firebase (Push Notifications), CodePush,
App Updates

Backend & Database (Architecture)

Node.js (Architecture Design), Express.js,
MongoDB, REST API Architecture,
JWT, OAuth, API Integration

Tools & Libraries

Redux Toolkit, React Query, Formik,
Axios, Git, GitHub, Postman,
VS Code, Figma, Canva

Cloud & DevOps

AWS EC2, AWS S3, AWS CloudFront,
AWS Route 53, Nginx, PM2,
SSL (Certbot/Hostinger), Domain Setup,
Deployment Management

Integrations & APIs

Razorpay Payment Gateway,
Google Sheets API, YouTube Data API v3,
Google Cloud (OAuth, API Access)

CORE COMPETENCIES

- Responsive Web Design
- Cross-platform Mobile Development
- API Integration & Third-party Services
- Application Architecture & Design
- Deployment & Release Management
- Problem Solving & Debugging
- Client Communication & Requirement Analysis
- Team Collaboration & Mentoring

LANGUAGES

Hindi

(Full Professional Proficiency)

English

(Professional Working Proficiency)

PROFESSIONAL SUMMARY

Full Stack Web & Mobile Developer with 2.5+ years of experience in building scalable web and mobile applications using React.js and React Native. Experienced in designing application architecture, developing production-grade systems, and implementing automation solutions. Skilled in API integrations, mobile app deployment, cloud configuration (AWS), and workflow automation. Strong hands-on experience in real-world client projects, team collaboration, release management, and cross-platform development.

WORK EXPERIENCE

LearnQoch

Nov 2023 – Present | Indore

Full Stack Web & Mobile Developer

- Developed and maintained scalable React.js and React Native applications for production.
- Migrated legacy React application from React 16 to React 21 with improved performance and modern practices.
- Built Android and iOS applications from scratch using React Native and deployed on Play Store and App Store.
- Implemented RBAC, reusable component architecture and dynamic dashboards.
- Integrated Razorpay payment gateway (end to end) for live client applications.
- Managed Firebase push notifications, OTA (Expo Updates) and CodePush for app updates.
- Architected backend structure and API workflows using Node.js and MongoDB.
- Configured and managed AWS services (EC2, S3, CloudFront, Route 53) and Nginx for production deployments.
- Worked on deployment tracking and reporting VS Code extension for internal engineering workflow automation.
- Collaborated with 8 member team, guided juniors, handled requirement discussions, client calls (Hindi) and delivered solutions.
- Resolved production issues, performed debugging and ensured smooth releases.

PROJECTS

1. RK Garage Management System (Live Client Project)

Tech Stack: React.js, React Native, Node.js, MongoDB

- Developed complete garage management software for a live automobile service business.
- Designed architecture, database schema and API workflows using Node.js & MongoDB.
- Modules: Vehicle Repair Tracking, Inventory Management, GST Billing, Customer History, Analytics, Reminders, Reports, Notifications and Role Management.
- Implemented Razorpay payment integration, invoice generation and real-time updates.
- Built responsive web dashboard and cross-platform mobile app.
- Deployed on live server with SSL, domain and managed production support.

2. Deployment Intelligence VS Code Extension (Internal Tool)

Tech Stack: JavaScript, Node.js, VS Code API, Git, HTML, CSS

- Developed a VS Code extension to automate production deployment tracking and release reporting.
- Compares last production build and new build to collect commits, merges, cherry-picks and push details.
- Generates detailed deployment reports with file-level diff, commit info and version tracking.
- Greatly improved transparency and reduced manual effort for management and engineering teams.

3. YouTube Automation Platform (Mobile App)

Tech Stack: React Native, Google Sheets API, YouTube Data API v3, Google Cloud

- Built a mobile app that automates YouTube video publishing.
- Integrated Google Sheets API to sync video data and scheduling information.
- Integrated YouTube Data API v3 for authenticated uploading and channel management.
- Configured Google Cloud Project, OAuth, API access and automated token handling.
- Automated timed publishing of videos based on schedule from Google Sheet.

EDUCATION

Master of Computer Applications (MCA)

Currently Pursuing
Indore, Madhya Pradesh

Bachelor of Computer Applications (BCA)

Barkatullah University, Bhopal
2022 – 2025

Higher Secondary (10+2)

MP Board
2019 – 2020

CERTIFICATIONS

- NASSCOM Certified Full Stack Developer
- React.js – Complete Guide (Udemy)
- React Native – The Practical Guide (Udemy)
- JavaScript Essentials (Coursera)
- Git & GitHub Fundamentals (Coursera)

ACHIEVEMENTS

- Successfully migrated major React application from version 16 to 21.
- Developed and deployed multiple mobile apps on Play Store and App Store.
- Built internal VS Code extension tool which improved deployment tracking and reporting efficiency.
- Consistently delivered scalable, production-ready solutions for real client businesses.
